Ghaziabad, Uttar Pradesh, India

EDUCATION

KIET Group of Institutions

Ghaziabad, India

B.Tech in Computer Science & Engineering (AI & ML)

2024 – 2028

CGPA: 8.5 (Through 2nd Year) | *Coursework:* Data Structures & Algorithms, Machine Learning, Cloud Architecture, Full-Stack Workflows

TECHNICAL SKILLS

- **Languages:** Python, C++, C, JavaScript, Dart, HTML5, CSS3
- **Machine Learning & Data Science:** PyTorch, TensorFlow, Keras, Scikit-Learn, Pandas, NumPy, EDA, Predictive Modeling
- **Cloud & Data Engineering:** Amazon Web Services (AWS Glue, Kinesis, Lambda, S3, Redshift), Cloud Architecture
- **Frameworks & Web:** FastAPI, WebSockets/Streaming, React, Django, Node.js, Express.js, MongoDB (MERN), REST APIs
- **Developer Tools:** Git, GitHub, Linux/Ubuntu, VS Code, PyCharm, Jupyter Notebooks, Power BI, Tableau

WORK EXPERIENCE

Data Analyst Intern | *Bluestock Fintech*

Jun 2026 – Aug 2026

Remote

- Calculated Historical Value at Risk (VaR 95%) and Conditional VaR (CVaR) across 40+ investment schemes.
- Analyzed mutual fund performance via 90-day rolling Sharpe ratios and assessed sector concentration using Herfindahl-Hirschman Index (HHI).
- Engineered an investor cohort and SIP continuity analysis script to identify at-risk accounts and automate risk-based fund routing.
- Built automated reporting scripts and data pipelines using Python, Pandas, NumPy, and Jupyter Notebooks.

Open Source Contributor | *GirlScript Summer of Code (GSSOC 2026)*

May 2026 – Present

Remote

- Implemented core feature updates and architecture patches across cross-platform codebases using Django and Flutter.
- Maintained clean Git branching strategies, submitted production-grade PRs, and resolved upstream merge conflicts.
- Participated in peer code reviews, unit testing, and standards verification alongside Project Administrators.

AI & ML Intern | *InternPe*

Jun 2025 – Jul 2025

Remote

- Developed and deployed 4 end-to-end ML pipelines for healthcare diagnostics, pricing predictions, and analytics.
- Built a Diabetes Prediction model using Logistic Regression on the PIMA dataset, reaching 90% accuracy with Pandas data preprocessing.
- Trained a Car Price Predictor using OneHotEncoder and hyperparameter tuning across 1,000+ variants to maximize R^2 scores.

NOTABLE PROJECTS

ReconZero: AI Financial Reconciliation Engine

Python, FastAPI, Pandas, Groq API, React

[Live Demo](#) | [API Docs](#) | [GitHub](#)

- Architected a hybrid parsing pipeline combining regex fast-paths with Groq LPUs for zero-temperature structured JSON extraction.
- Optimized LLM throughput by chunking irregular narrations into 25-item batches, cutting API calls by 96% and eliminating rate limits.
- Implemented a deterministic engine using Pandas vectorized joins for exact decimal parity to prevent math hallucinations.
- Built a responsive React BI dashboard with dual-axis analytics to triage expected Payment Gateway MDR fees (1.0%–3.0%) from drift.

Autonomous AI Portfolio Assistant

Python, FastAPI, Groq (Llama 3.3), Google Cloud Firestore, RAG

[Live Demo](#) | [GitHub](#)

- Engineered an autonomous conversational agent using FastAPI, Groq (Llama 3.3), and streaming response endpoints to achieve sub-400ms time-to-first-token (TTFT).
- Architected a RAG and tool-calling engine with Pydantic validation, implementing strict schema guardrails and human-fallback criteria to eliminate hallucination drift.
- Integrated Google Cloud Firestore for persistent conversational state, session tracking, and real-time interaction analytics across Vercel and Render.

Meteor Madness – NASA Space Apps Challenge 2025

Python, Data Processing

- Built a space science simulation platform with a cross-functional team, placing in the Top 15 out of 35 regional teams.

CERTIFICATIONS & LEADERSHIP

- **AWS Certified Data Engineering Associate (DEA-C01):** AWS Glue, Kinesis, Lambda, Redshift, S3 pipelines, IAM governance.
- **AWS Certified Cloud Practitioner (CLF-C02):** Cloud security baselines, serverless architecture, cost-optimization models.
- **Treasurer | NextGen Supercomputing Club @ KIET** (Nov 2025 – Present): Managed a 50,000 INR budget allocation for a 3-day AI summit and hackathon; directed corporate sponsorship outreach via LinkedIn and email.
